Project Summary Template

This document is intended to provide a summary understanding of the high-level vision of your project goals.

Company Name	Stray No More
Company Address	34 Dawson Ave West, ON L6J 8K4
Company Website	www.straynomore.ca
Telephone	416-000-0000
Contact	Faheem Ahmed, Edward Philip, Abdirahman Ali, Emin Muhammed Yilmaz
Title	CEO's/Visionaries
Email	Faheem.ahmed@georgebrown.ca , Edward.philip@georgebrown.ca, abdirahman.ali@georgebrown.ca , Muhammed.Yilmaz@georgebrown.ca
Telephone	416-111-1111, 416-222-2222, 416-333-3333
Project Title	The Stray No More Mobile app
Project Description	**About the company:** Stray no more is is a charity organization based in the greater Toronto area.We hope to help any animal in need from a neighborhood skunk to a missing household cat that can't find its way home. We want to educate the public about the animals around them and provide them with the resources they may need. Our mission is to spread awareness and assistance to animals that are found and may need immediate attention. **About the project:** We will develop and maintain a mobile app that will allow users to post images of animals they find as well as post any sightings of pets that have been listed as missing in the city. Based on the type of animal, information pertaining to how to deal with the situation will be given. Based on the location of the animal, nearby animal shelters/facilities will be displayed as well as contact information. Users on the app can communicate with others through an in app messenger feature in the case of a missing pet or may be able to help with assistance if given. This will help in trying to reunite the found pet, or receive information on how to care for and find a safe place for the animals in question. The application will have GPS tracking that will provide the location of where the animal was spotted as well as information about animal assistance/animal shelters near by.

Problem/ Opportunity Assessment *	*Please describe current state problem/opportunity that describes the nature and extent of the problem (factual, quantified, concise), or that outlines a chance for advancement or progress.*

1	People may not know what to in the event with an encounter of a stray animal, so our application will give all the necessary information regardless of animal and may help reunite an animal with an owner or just help the animal in need
2	Pet searching methods have been stagnant for the past few decades
3.	No centralized online community for helping people find their pets or help regular people deal with stray animals
4.	An opportunity to develop a competent and effective association that provides information on missing animals/strays in the city, how to deal with them and information on what to do in an encounter

Desired Project Outcomes/ Requirements*	*Define how this project shall address a business need, e.g. the business problem or opportunity described above; describe what the beneficiary must be able to do / receive from the solution*	
	1.	Creating an efficient way to deal with stray animals or missing pets
	2.	Logs location, time, and brief location of stray animals/pets sightings across the city
	3.	Provides real time messenger and up to date info on pet whereabouts
	4.	Gives notifications to users once pet has been spotted.
	5.	Provide information pertaining on how to deal with situations regarding stray animals. Locates nearby facilities that may help accommodate and/or helps gives information on what should be done in the given situation
Key Deliverables to be produced by students*	*Define the boundaries of work that you expect to receive from the students effort (vs. internal effort)*	
	1.	Front end development- Creating website that illustrates the apps functionality and where to download it
	2.	Front end development - user interface of the mobile application
	3	Back end development- Form databases for necessary user information and
	4.	animal/pet description.
	5.	Gathering necessary information with regards to how to deal with animals and
	6	inputting it within the application. Gathering locations of animal facilities,humane societies and other animal associations that may help with the issue at hand.
	7	Development of app functionality, creating necessary functionality of messenger, image uploading and displaying, chat functionality, location proximity with necessary information displayed
	8	Integrate Google maps API that gives location of spotted animals, and in app messenger with notifications to your lock screen if desired. Location of animal treatment centers near to where animal was spotted. Provide information on how to deal with a specified animal in case it is a stray or a pet or who to call in the given scenario.
Desired Start Date	October 23rd, 2020	
Desired End Date	April 5th,2020
